# INTRODUCTION

## About Narsimor

---

Narsimor Global Private Limited is an India-based trading and sourcing company specializing in industrial chemicals, specialty chemicals, aroma chemicals, essential oils, pigments, and home & hygiene formulations.

We support manufacturers, distributors, and institutional buyers across domestic and international markets by delivering consistent quality, compliant sourcing, competitive pricing, and reliable supply chains.

Our focus is on building long-term global partnerships through transparency, professionalism, and customer-centric service.

## Why Choose Narsimor

---

Narsimor operates its chemical portfolio under a disciplined operational and quality framework designed for industrial reliability and repeat procurement.

### Quality & Compliance Discipline

All chemicals are managed through structured quality controls, batch-level verification, traceability mechanisms, and complete technical documentation, ensuring consistency and regulatory alignment for downstream industrial use.

### Packaging & Supply Flexibility

We offer bulk and packaged supply options with industrial-grade and application-specific packaging, supported by controlled handling processes and scalable volumes for contract and repeat requirements.

### Domestic & International Execution

Our operations support dependable domestic and export supply with documentation-ready processes, coordinated logistics execution, and proven experience across multiple industrial sectors.

### Operational Reliability

Beyond supply, we focus on specification consistency, application suitability, and continuity of supply for critical industrial inputs—enabling stable, long-term procurement relationships.

# CORE INDUSTRIAL & COMMODITY CHEMICALS

# BEST SELLER

## Soda Ash

A widely used industrial alkali supporting glass manufacturing, detergents, chemical processing, and water treatment applications.

## Caustic Soda

A strong alkaline chemical essential for chemical manufacturing, pulp & paper, textiles, detergents, and industrial cleaning processes.

## Phosphoric Acid

A high-purity industrial acid used in food processing, fertilizers, surface treatment, water treatment, and chemical manufacturing applications.

# BEST SELLER

## Citric Acid

An organic acid commonly used as a pH regulator, chelating agent, and preservative across food, pharmaceutical, and industrial formulations.

## Sodium Bicarbonate

A versatile chemical used in food processing, pharmaceuticals, flue gas treatment, fire safety, and industrial buffering applications.

## Bleaching Powder

An oxidizing agent widely used for water disinfection, sanitation, bleaching, and industrial hygiene applications.

# SOLVENTS & SPECIALTY ORGANIC CHEMICALS

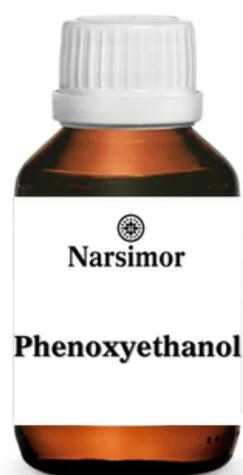

# BEST SELLER

## Isopropyl Alcohol

A high-purity solvent widely used for cleaning, disinfection, formulation processing, and pharmaceutical and industrial applications.

## Phenoxyethanol

A multifunctional organic compound used as a preservative and solvent in cosmetic, pharmaceutical, and industrial formulations.

# PIGMENTS & INORGANIC SPECIALTIES

# BEST SELLER

## Iron Oxide Pigments

Inorganic color pigments used in construction materials, coatings, plastics, and industrial applications where color stability and weather resistance are required.

## Ultramarine Blue

An inorganic blue pigment used for coloration and whitening applications in plastics, coatings, detergents, and industrial formulations.

## Titanium Dioxide

A high-performance white pigment widely used in paints, coatings, plastics, inks, and construction materials for opacity, brightness, and durability.

# SURFACTANTS, DETERGENTS & PROCESS CHEMICALS

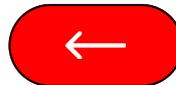

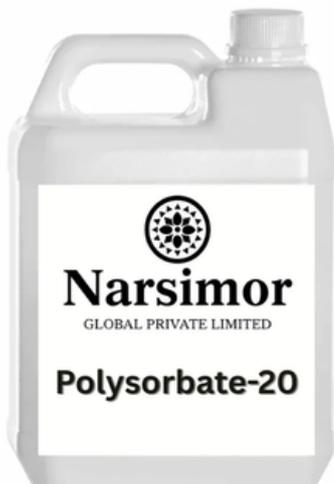

# BEST SELLER

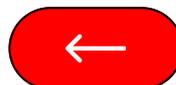

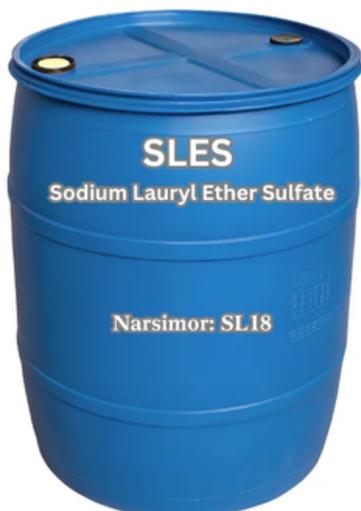

## LABSA

A primary anionic surfactant widely used in the manufacture of detergents, cleaners, and industrial washing formulations.

## Polysorbate-20

A non-ionic surfactant used as an emulsifier and solubilizer in cosmetic, pharmaceutical, and industrial formulations.

## SLES

A high-performance surfactant used for foaming, emulsifying, and cleansing applications in detergents and hygiene formulations.

# BEST SELLER

## CARBITOL

A glycol ether solvent used as a coupling agent in coatings, cleaners, inks, and industrial process formulations.

## Bio Enzyme Cleaner

An enzyme-based cleaning concentrate designed for grease breakdown, odor control, and sustainable industrial cleaning applications.

## Floor Cleaner Concentrate

A formulation-ready cleaning base used for producing floor cleaning solutions for commercial, institutional, and industrial environments.

# BEST SELLER

## All-Purpose Cleaner Concentrate

A versatile cleaner base suitable for multi-surface cleaning applications across commercial and industrial settings.

## Glass Cleaner Concentrate

A concentrated formulation base designed for streak-free cleaning of glass and reflective surfaces.

## Dishwash Liquid Concentrate

A surfactant-based concentrate used for manufacturing dishwashing liquids with effective grease removal properties.

# BEST SELLER

## Handwash Liquid Base

A ready-to-formulate liquid base designed for handwash products used in commercial, institutional, and retail applications.

## Disinfectant Liquid Base

A formulation base used in the production of disinfectant solutions for hygiene, sanitation, and surface disinfection applications.

## Air Freshener Perfume Base

A ready-to-use fragrance base developed for air fresheners and ambient scent products, offering balanced diffusion, stability, and compatibility with common formulation systems.

# BEST SELLER

- Pine Oil
- Citronella Oil
- Lemongrass Oil

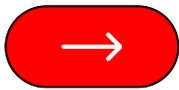

# BEST SELLER

- Orange Oil
- Tea Tree Oil
- Eucalyptus Oil

# BEST SELLER

- Linalool Oil
- Castor Oil
- Menthol Oil
